

Workshop

Virtual Development in Passive Safety and Human Models for Future Mobility

21 September 2021

University of West Bohemia in Pilsen and Technische Hochschule Ingolstadt would like to invite you to the second joined workshop on Virtual Development in Passive Safety and Human Models for Future Mobility.

The event addresses topics from virtual development in passive vehicle safety for the mobility of the future. It contains research work, reaching from biomechanics and human body modelling to crash and occupant simulations, as well as crash accident reconstruction. The main objective is to connect young Bavarian and Czech researchers in this field.

The workshop is planned as a one-day online event. It includes two keynote lectures from Czech and German recognised experts. Prof. Jan Kovanda from University of West Bohemia and Prof. Axel Schumacher from University of Wuppertal. There will be two sessions of young researchers' presentations following with a discussion forum on the presented topics.

If interested in presenting your research (20 min) at the workshop, please contact the organisers. The deadline for a brief description of your topic is 31 August 2021.

The workshop is supported by Bavarian-Czech Academic Agency (BTHA) and Ministry of Education, Youth and Sports of the Czech Republic (MŠMT).

Organisers: University of West Bohemia
Univerzitní 2732/8, 301 00 Pilsen
